

Home Learning, E-Learning Ideas

Books are a wonderful way to start a learning engagement. Share with your child or student the book The Most Magnificent Thing by Ashley Spires. A link to the book being read aloud is found below.

Young Children:

We all get frustrated. Read or listen to the book together. Collect either large Legos, blocks, or any other building material. You may also gather some household items, such as bowls, paper towel rolls, straws, canned soup, pillows, etc. Encourage your little one to build a new structure. They can draw and label a picture of their creation.

Older Children:

Collect Legos, blocks, or any other building material. Children can build any of the following:

- Design a indoor playground for a toddler
- Create an obstacle course for kids your age.
- Think of a problem you would like to solve. Design an invention that helps with that problem. Create a model of your invention.
- Write a paragraph describing your invention.

Take a picture of your design and email it to us. We'd love to see your finished products. Email us at:
